

Vienna, July 2016

Grant and Financing Advisory from EnTri Consulting

Advisory services regarding **grants, subsidies and other funding instruments** on an international level belong to the core competences of EnTri Consulting GmbH. This includes specifically.:

- ✓ **Identification** of the most suitable funding instruments,
- ✓ **Drafting of the application**, and
- ✓ Assistance in administration and **reporting** towards the funding institution.

for its clients.

Since many years Klaus Tritscher, Managing Director of EnTri Consulting, is an officially certified **Export Consultant** by „incite“, the certification institute of the Austrian Chamber of Commerce, safeguarding the highest level of professional approach in respect to optimization of funding sources.

We are proud to state that we have supported over twenty private and public sector clients in regard to grant applications very successfully: **All grant applications have been approved!**

We have outstanding know-how and references in respect to the following financing programs/institutions, providing i.a. grants & subsidies:

1. EU Funding Programmes

We focus on (grant-) funding for international projects in the areas of **renewable energy** and **environmental technology**. Apart from selected calls under the Horizon 2020 Programme we do not focus on research- and development financing or early stage financing in connection with new technologies.

EU External Aid programmes are clearly our core competence within the frame of EU funding programmes.

2. Grant schemes for Austrian companies, specifically from

- a. **ADA** – (Austrian Development Agency), with focus on the Commercial Partnership Programme (grants of up to EUR 200.000,00) with companies from developing countries;
- b. **aws** – (Austria Wirtschaftsservice) with its broad range of instruments
- c. **Regional Austrian Grant Institutions** (for ex. Vienna Business Agency)
- d. **Go international** – an initiative of the Austrian Ministry of Science, Research and Economy, together with the Chamber of Commerce (current program-period open until 2019).

The EU „De Minimis“– guideline is applicable to the go international program, allowing up to EUR 200.000,00 of such grants per company over a 3 years' period.

3. US Funding-/Grant-Institutions

Apart from funding institutions and financing-/grant facilities from the European Union and its member countries EnTri Consulting has an additional focus on non-European financing and grant institutions.

Specifically with US based funding/grant-institutions long-lasting positive experience can be demonstrated. EnTri Consulting can provide you with background information about the missions and modalities of operation of US institutions such as MCC, the Millennium Challenge Corporation headquartered in Washington DC, having a particular focus on selected developing countries and business sectors.

4. International Financing Institutions (IFI)

regarding consulting services in the energy sector EnTri has signed a 4 years framework contract with the European Investment Bank (EIB). Furthermore we are very well acquainted with the terms and conditions of other IFI's, such as World Bank (specifically its private sector unit IFC, the International Finance Corporation), EBRD and others.

All details regarding our expertise in the area of grants & including many references can be found in the website www.entri-consulting.com.

Feel free to contact EnTri Consulting any time to receive the best support for your search, selection, application and administration of the most suitable financing-solution, grants and subsidies for your international activities.
