**Re: Reference Letter**

**BT-Wolfgang Binder GmbH** is a leading general contractor specializing in mineral and environmental technology. BT-Wolfgang Binder is a reliable partner for complete turnkey plants, reconstruction and extensions in plant engineering worldwide.

In the field of optical sorting we are successful on a national and international level with our innovation REDWAVE, a sensor-based sorting technology.

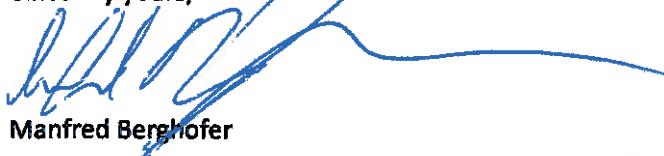

Together with the two other Austrian companies **IUT Ingenieurgesellschaft Innovative Umwelttechnik GmbH** (comprehensive consulting and planning services with focus on waste management, environmental- and security technology) and **Water & Waste Gesellschaft für Umweltschutz und chemische Laboratorien GmbH** (chemical analyses of water, wastewater, soil air quality measurements, geotechnical expertise's, waste assessments, landfill planning) we cooperate in regard to the market entry into the Egyptian waste management market.

To reduce market entry costs **EnTri Consulting** proposed to us an application under the "go international" grant schema provided by the Austrian Chamber of Commerce and Ministry of Economy.

Throughout the application process EnTri Consulting has guided and actively supported us. Within the short period of 3 weeks following the application we received the award letter regarding the maximum available grant amount of EUR 24.000.

**In view of the competent and successful application support we are very satisfied with the services of EnTri Consulting and gladly recommend cooperation with this company.**

Sincerely yours,

Manfred Berghofer
